# DAR v2

Digital Alchemy Registry

Q: Can you organize a bid on a computer to be built using an opinionated proposal registry ratio of sized compute versus media NFTs?

Architecture

Mechanism Design via Resources & Runes as Token Relic

- For bondage on result, closing a vote returns funds to talis creator, with tree totem trump transfer

- For winning talis resource rounds, verifiable random runes assigned as future token vote trumps

Example Resources : Using planet lore as inspiration for sized *compute files* on Fluence or *media* on fevm

Attacks or Malice Prevention

- Sybil, multiple votes
- Bloating with junk to end proposal search
- Winner keeps oscillating between 2 owners (may not be that bad if blueprint is greater than a certain number of resources)
- Decoupling resources from people
